

Project Proposal: GHCAA – An Alumni Ecosystem

Date: April 28, 2026

1. The Problem

Most alumni associations struggle with a "fragmented" community—relying on scattered WhatsApp groups, manual spreadsheets, and outdated paper records. This project, **GHCAA (Govt. Haraganga College Alumni Association Platform)**, is designed to solve this. The actual goal is to build more than just a website; it is an enterprise-grade ecosystem that manages the entire life of an alumnus—from their first registration to career-long networking and financial contribution.

2. The Public Portal

This is the association's general public, guests, and alumni who haven't signed up yet.

Alumni Sign-Up: A simple, step-by-step wizard for alumni to submit their details (personal, college days, and career) for verification.

The Info Hub: A look at who we are, our history, and the current leaders (Executive Committee) running the show.

Event Highlights: A browseable list of upcoming reunions and seminars, complete with ticket info and guest rules.

The Library: A dedicated space to read the association's Constitution and governing rules, organized by article.

Photo Gallery: A high-quality trip down memory lane with archives from past events and college milestones.

Guest Access: A spot for non-alumni to register as guests or for donors to contribute directly to college grants.

3. The Member & Admin Portal

Once members log in, the system changes based on whether you are a member or an administrator.

For Members (The Alumni Hub)

Digital ID & Wallet: Instant access to your QR-coded membership card and official certificates—ready to download or print.

instantly.

Smart Directory: A searchable list of old friends. Use the batch/job filters or just ask the "Haraganga AI" to find someone for you.

Easy Payments: A way to pay your yearly dues via bKash or Nagad and grab your PDF tax receipts

Privacy Control: You decide what others see. Use simple toggles to hide your phone number, NID, or home address.

Chat & Careers: Real-time messaging to catch up with peers, plus a board to post jobs or find a professional mentor.

The Virtual Lounge: A fun space for informal networking where members can earn "Contribution Points" and badges for being active.

The Voting Booth: A secure, private way to have your say in member polls and official association elections.

For Team (Admin Center)

Member Approvals: An easy workflow for the team to review new applications and keep the member list accurate.

The Ledger: A total-transparency financial board that tracks every single Taka (income and expenses) in real-time.
Office & Asset Tracker: Tools to manage the physical office budget, the "Recreation Zone" setup, and association property.
Event Planning: Everything needed to run an event—set tickets, manage budgets, and scan ticket QR codes for live attendance.
Mass Messaging: A quick way to send beautiful emails or urgent SMS alerts to specific batches or groups.
Digital Archives: A safe place to store committee history, meeting minutes, and legal registration papers.
Style Switcher: A "one-click" way to change the website's header look for National Days or special college anniversaries.

This document is submitted as the Final Project Proposal for the Executive Masters in Information Technology (EMIT) program at the Institute of Information Technology (IIT), University of Dhaka.

Proposed Supervisor: Dr. Kazi Muheymin-Us-Sakib,
Professor, Institute of Information Technology, University of Dhaka.

Student Name: Md. Habibur Rahman,
ID-2507220, EMIT, Batch-7, IIT, University of Dhaka.
